Tuesday's forum address by

South Korean ambassador

Young-choon Hahn will kick

off a panel discussion on

Other activities include a

Chinese banquet, a fireside

and an Oriental art exhibit.
Hahn will speak in the
Marriott Center on "Korea and
Asia—Crisis, Continuity
and Change."

Hahn is native of Seoul,

Korea, and received his B.A.

in Economics at Northwestern University in

Evanson, Ill, in 1956.

Saturday, a Chinese

newspaper ushering in the Year

of the Rabbit will be held at

6:30 p.m. in the Marriott

School at 150 S. 500 East in

Provo. A six-course dinner of

Chinese food will be served.

A fireside will be held

Sunday at 6 p.m. in 346

ELWC. Dr. Spencer J. Palmer,

chairman of Asian Studies,

will be the guest speaker.

An Asian art exhibit will be

on display starting Monday

and will continue through

Feb. 21.

The Helmut Callis collection will be on display in the ELWC Art Gallery, where Helmut Callis, professor of Chinese History at the University of Utah, will give a lecture at 1:15 p.m. Monday.

The collection will be displayed along with the Leroy Pharis collection.

The Callis collection contains statues, scrolls and paintings from the summer palace of Peking.

Other activities scheduled for Monday include displays of the Chinese Club, Japanese Club, Korean Club, Thailand Club, Asian Branch and Asian Studies.

All students and faculty are invited to dress in Oriental attire Monday.

Valentine, have a heart!

5, daughter of John Oscarson of Chemical Department, thinks Valentine's Day is fun, but Laren Westenskow's son Brad, 4, isn't so

sure. The two are shown in a photo by Loren Westenskow.

Memories relived at groundbreaking

By CLINTON GIESE

Universe Staff Writer

Top hats and black coats were appropriate at the groundbreaking ceremony for BYU's carillon tower.

Dressed in 19th century attire, Pres. Dallin H. Oaks presided over the ceremony and rode a top an inverted earth-moving scoop pulled by two clydesdale horses.

Pres. Oaks began festivities with a brief talk on Mormon history and its emphasis on social welfare.

He assured the 150 to 200 spectators and guests that the university has the resources to complete the bell tower without diluting its efforts in other activities, such as the library addition.

Carillon chimes

The bells in the tower will not play the traditional Westminster Chimes programmed for most carillons, said Dr. Lorin F. Wheelwright, who followed Pres. Oaks. Instead they will play, on the hour, the final

purposes explained.

The carillon tower will be explained today at 6:30 p.m.

KBYU-TV announced that Dr. Wheelwright will be interviewed on the

"Newsroom Eleven" program by Michael Peterman of

cadence of the Mormon hymn, "Come, Come, Ye Saints"; "All is well."

Following Pres. Oaks, Dr. Wheelwright, Provo Mayor Russell D. Grange and several other dignitaries made the short groundbreaking trek.

See photos on page 6

The 90-foot structure is scheduled for completion by Homecoming Week next October, said Pres. Oaks.

He noted that President Spencer W. Kimball, president of the Board of Trustees for BYU, will be the Founders' Day Convocation guest speaker on Oct. 12.

Following that event, those in the Marriott Center will be invited to adjourn to the bell tower for dedication services.

Reporters explained.

KBYU.

Dr. Wheelwright will discuss the things that make the carillon unique, symbolic, and desirable on campus.

Centennial play

'Ballad' will get music

By KEN GIBSON
University Staff Writer

The music for "The Ballad of Brigham Young," a musical show to be the finale of the BYU Centennial year, will be completed by August, although it is still in the beginning stage now.

K. Newell Dayley, BYU assistant to the president, now working on the music on a part-time basis, but plans to devote the whole summer to writing it so it will be completed by the end of the summer.

According to Dayley, it is necessary to write the songs, arrange the orchestra, arrange the music to the music and have the music copied for the orchestra score and for the chorus.

The appointment of Dayley to write the music for the play was announced in January by Dr. Loring F. Wheelwright, assistant to Pres. Dallin Oaks, who is in charge of the Centennial year celebration. The choice was made after a year of sifting through various church members, according to Dayley.

The script for "The Ballad of Brigham Young" has been written by Arnold Sungaard of Massachusetts, who was

also the author of the lyrics for the play "Promised Valley."

The show is to be performed in April of 1976 in the Marriott Center, according to Dayley.

The composer sees the play as "A welding together of Brigham Young, the university, and Brigham Young, the man, with music playing a very important role."

The play is more than a historical account, Dayley added. "Those who are foolish enough to be entertained will be entertained. However, those that are looking for the answers to some 'whys' will also find them."

Dayley mentioned that although the play doesn't come right out and answer these questions, "running through the whole thing are hints as to why this place is so unique and the struggle it had to go through to be unique."

According to Dayley, sound will be a dramatic element in the show, and music will play through about two-thirds of the production, in solos, choruses, instrumental features or as background in all kinds of situations.

The play, rather than a biography of

Brigham Young, is more a look at the past and future of Brigham Young. "I will let the situation in time dictate the melody so that it will be easy for the audience to remember," Dayley added.

Dayley, in his fifth year as a member of the BYU faculty, received his bachelor of arts degree from BYU in music education in 1964. He received his masters degree from USC and is currently working on his doctorate there.

Currently, Dayley is director of bands at BYU, conductor of the Wind Ensemble, director of the jazz ensemble "Synthesis," member of the LDS Music Subcommittee for Composition and Youth Music, and has been musical director for scores of stage productions at BYU.

A prolific composer and arranger, he has written many composition for voices, organ, piano, other instruments and orchestra. He is a member of the Relief Society, Sunday School, MIA, and Aaronic Priesthood of the LDS Church. He has served as orchestrator for the combined choirs and Mormon Youth Symphony Orchestra.

K. Newell Dayley (seated) reviews script for "The Ballad of Brigham Young" with Arnold Sungaard.

Trip brings ideas, no concert

By JIM TALBOT
University Staff Writer

Six days at the National Entertainment Conference in Washington, D.C. brought new ideas to the Social Office, but not bookings for concerts for the remainder of this year.

According to Leonard Lee, ASBYU student body president, "The conference made no direct impact on the student body," but in the long run, through getting acquainted with agents and agencies, there should be smoother procedures and processes in booking groups in the future.

Lee said that the purpose of going to the conference wasn't to find acts for this year, but to attend workshops to learn about programming, publicity and contracts.

● Activities
scheduled
for 'Week'

(Cont from page 1)

Students will attempt to build a black box, then stamp other students as to its content.

The Tuesday will feature a lecture by R. Gilbert Moore of the Thiokol Chemical Co. of Ogden at 10 a.m. in the de Jong Concert Hall, HFAC.

At noon, the Joint Engineering Council will hold a College Bowl in the lounge of the College of Science and Technology Building.

That will be followed at 1 p.m. in the McKay Quad by the Survey Travers Contest sponsored by the Civil Engineering Department.

Three- and four-man crews will use surveying equipment to close a short, four-sided traverse with speed and accuracy.

Friday will be marked by the College Bowl finals in 377 ESTB at noon.

The College Bowl open house

will begin at 10 a.m. in the Engineering Building and continue until 5 p.m.

Dan Morgan, small concerts chairman said, "If we can implement half of what we learned, the conference will be worth it."

According to Morgan, the conference was geared to three areas: concerts, films and lectures.

In the field of publicity, explained Morgan, video tape can change everything 100 percent. "Things were brought up that we've never thought of before."

Morgan said the area of videotape is wide open and BYU needs to get involved. An example using videotapes, explained Morgan, is bringing tapes of top national groups to BYU for the students to see for practically no cost at all.

There are new concerts coming out, said Morgan, consisting of taped music and many different kinds. "It's very unique," remarked Morgan.

Some of the problems with this year's concerts added Morgan, have been an inability to work with the other universities throughout the area, the skyrocketing cost of booking groups, conflicting with state activities and some bad judgment in booking some groups. Through attending this conference, Morgan said he feels the quality of concerts will be high next year.

As for the remaining concerts this year, Morgan explained that trying to get groups now would be difficult, since many of the top groups are totally booked up.

Police investigate accident at 1850 N. University Avenue, east of Wyview village, where one woman was injured Thursday.

**Auto accident injures one
in 2-car collision Thursday**

The wife of a BYU student was injured in an auto accident at noon Thursday when her car was hit by another vehicle.

Karen Smits, 22, of 1990 University No. 129, made a left

hand turn in a small foreign car into the path of an oncoming full-size sedan, according to Officer Gary Ogilvie of Provo Police Department.

Capitol to be site of ERA rally

A rally in support of the
Equal Rights Amendment
will be held Monday at noon
in the Utah State Capitol,
according to Lee Ann
Walker, chairman of the
Utah County caucus of the
Equal Rights Amendment
Coalition of Utah.

The rally, which will
include speakers and music,
will call on the Utah
legislature to ratify the
amendment, which says:

"Section 1. Equality of
rights under the law shall not
be denied or abridged by the
United States or any state
on account of sex.
"Section 2. The Congress
shall have the power to
enforce by appropriate
legislation the provisions of
this article."

"Section 3. The
amendment shall take effect
two years after the date of
ratification."

Representatives from the
Fork area show 60 per cent
are in favor of the Equal
Rights Amendment. A
proposal was also made by
the coalition to remain
organized until after the 1976
elections and to become
involved in other issues, she
said.

Ford names woman to Cabinet post

WASHINGTON — President Ford chose a woman for his
Cabinet on Thursday, nominating Carla Anderson Hills, 41,
to be secretary of Housing and Urban Development. She
would become only the third woman Cabinet member in
history.

Mrs. Hills, a Republican, has been assistant attorney
general in charge of the civil division at the Department of
Justice since April 1974.

The only previous women members of the Cabinet were
Frances Perkins, secretary of Labor in the Franklin D.
Roosevelt Cabinet in 1933-45, and Oveta Culp Hobby,
secretary of Welfare in the Dwight D. Eisenhower Cabinet in
1953-55.

Food stamp prices frozen until 1976

WASHINGTON — President Ford announced Thursday he
will allow to become law without his signature a bill which
freezes the price of food stamps through 1975 at the level of
last Jan. 1.

Brezhnev talks to Harold Wilson

MOSCOW — Soviet leader Leonid I. Brezhnev, smiling,
joking and looking tanned and healthy, surfaced in public
Thursday for the first time in 51 days to talk with
British Prime Minister Harold Wilson.

Ending what is believed to have been the longest absence
from public view ever for a Soviet leader, the 68-year-old
Communist party chief received Wilson in the Kremlin,
where they laughed and traded quips as they posed for
photographers in a chandelier-laden reception room.

It was the first visit by a British prime minister to Moscow
in 18 years and was aimed at improving relations gone
badly since Britain expelled 105 Soviet officials in 1971 on
spy charges.

Cypriots set up separate state

NICOSIA, Cyprus — Turkish Cypriot leaders today
proclaimed a separate state in the prosperous northern 40 per
cent of Cyprus they have occupied since the Turkish invasion
last summer.

Lost articles

to go on sale

The BYU Lost and Found
Dept. will sponsor a sale
Saturday in the Main
Auditorium, ELWC, from 11
a.m. to 2 p.m.

Bob Moss, Wilkinson
Center business manager, said
items that have been in
lost and found for over two
months will be sold.

"There's always a good
turnout to these sales," Moss
said. "Usually students start
lining up for the sale between
seven and eight o'clock in the
morning."

Y gets research grant

A \$101,448 research grant from the National Institute of Health has been awarded to a team of BYU parasitologists to study ways of controlling hydatid disease in Utah's dog and sheep populations.

The disease, which also infects humans, is more prevalent in Utah than previously recognized, according to studies begun in 1970.

Dr. Feron L. Andersen and

Ray M. Loveless, research associate in the College of Biological and Agricultural Sciences, are heading up the studies at BYU.

The cysts contain larval forms of minute tapeworms called *Echinococcus granulosus*. The adult stage of this tapeworm develops in the small intestines of dogs, coyotes and wolves, the professor explained.

Dr. Andersen said sheep and dogs are the most common carriers of echinococcal infection and therefore the disease is most prevalent in sheep country. Sanpete County, a sheep-raising area, has had the highest incidence of hydatid disease in Utah and is ranked with other highly endemic areas of the world, he noted. "We are looking into the possibility that a reservoir of *Echinococcus granulosus* exists in the state's wildlife populations such as in deer, coyotes and wolves," the professor said. "There is such a reservoir in Arizona and California, but so far we have found none in Utah."

Dr. Andersen explained the life cycle of the organism.

Tapeworm eggs are carried into the environment with the feces of infected animals. Grazing animals ingest the eggs which eventually are transported in the blood stream to the liver, lungs or other organs of the new host, and cysts are found.

Dogs or other carnivores eat cyst-laden viscera of infected grazing animals, and introduce tapeworm larvae

Films to run BYU Young Ambassadors tonight at 7, 9 next shows to be Feb. 21

The BYU Film Society's cooperation with Program Bureau, are now rehearsing for their next show, which will be at Weber State College on Feb. 21 and 22.

The Young Ambassadors is a group of 50 amateur/professional entertainers, said Noah Sifuentes, public relations director for the Young Ambassadors.

The group is made up of musical back-up, dancers, comedians, and others, to entertain national and audiences, Sifuentes said. The BYU as an institution of high well as carry an international peace and act as a proselyting Church.

Why everybody's pretending they're us.

There was a time when the EARTH negative shoe was the only shoe in the world with the heel lower than the toe. In those days the other people who made just laughed at us.

But things have changed. And now that you love our Earth negative shoes so much, the shoe companies have stopped laughing and started copying. They don't understand it. Merely lowering the heel of a

shoe isn't enough. And imitating the outside of our shoe isn't enough.

Just because a shoe is like the Earth doesn't mean it works like the Earth shoe.

It took many years to perfect the Earth brand shoe. To get the arch just right. To make the toes wide, comfortable, adjustable, and to balance the shoe. To mold the sole in a special way so that it will allow you to walk in a natural, natural motion. Gently and easily, even on the hard jarring cement

Our shoes are sold at stores that sell only the EARTH® SHOES

Varicose vein not hereditary

By Dr. MARY K. REDFORD
Health Center Internist

Q. My family has a tendency to develop varicose veins, and I'm following the tradition. What can I do to prevent it?

A. A tendency for development of varicose veins does occur in families and is the result of congenital weakness of the veins and/or the valves that regulate the blood. Standing seems to be an important causative factor. Obesity seems also to predispose to the appearance of varicose veins.

Conservative measures such as keeping the weight normal

and avoiding prolonged periods of standing or sitting, wearing support hose and elevation of legs frequently may be of value in preventing the progression in mild cases.

In some individuals who are prone to fluid retention with resultant swelling of the hands, feet and ankles, salt restriction or even a diuretic (prescription drug to get rid

of the fluid retained) may be helpful.

The long-range outlook for developing complications is extremely variable, depending on the strength of the vein walls and the competency of these veins. If one vein is experiencing localized pain, night cramps, heaviness or fatigue of the legs, ulceration, edema (swelling) and dermatitis (inflammation of the skin) in the area of the varices, then it is best to seek medical attention for evaluation and treatment. In selected individuals, surgical correction by ligation (tying and cutting) and stripping of the veins may be beneficial.

Y radio to air Latin music

KBYU-FM will present a special live program on Saturday from 9:30 a.m. to 10 a.m., with songs and music from Mexico, Chile, Argentina, Brazil and Colombia.

According to Pablo Keselman, announcer of the program, this presentation will be entitled "Si Somos Americanos," and will feature two BYU singers Elsa Rico from Chile and Norma Imperatriz of Argentina.

Top hats, memories mark rites

(Cont. from page 1)

Dr. Edwin Haroldsen, heading the BYU program, added that interesting events of the centennial year will also be discussed.

Overcast skies

In Thursday's ceremony, overcast skies threatened snow or rain, but it remained dry in comfortable temperatures. Two horses used symbolically to break the ground were furnished by Lee and Guy Palmer from South Jordan.

When he introduced the owners Pres. Oaks said many years from now these horses would be remembered long after the people were gone.

The horses, named Queen and Bud, were anxious to get the ceremony over with as each dignitary took his turn at the reins. They moved briskly up and down the grassy slope at times controlled only by the owners, who stood by shouting "whoos" and "giddups" at the appropriate times.

The animals, Bud Palmer said, weighed 1,700 pounds each and were similar to those used in excavation work before the turn of the century and the advent of mechanized earth-moving equipment.

The "scoop" pulled behind the two horses was an iron-tipped wooden implement used to excavate for foundations when BYU began nearly a century ago.

Arizona to offer no hugs, kisses

By DOUG ARMSTRONG
Assistant Sports Editor

Even though it is Valentine Day, the Cougars will not find hugs and kisses awaiting them when they play Arizona tonight in Tucson and Arizona State on Saturday.

The Cougars, high from their recent two-game home sweep of CSU and Wyoming, are 10-3, with a 18-18 record and ranked Arizona and eighth-ranked Arizona State.

Arizona, 4-3 in WAC play, is currently tied with UTEP and Utah for second place in the conference and is 15-4 overall.

The last time Arizona and BYU met, the Cougars were beaten 83-66 in Provo as forward Brian Fishman and Wildcat center Bob Elliott shared game scoring honors with 27 points apiece.

Forward Fred Fleming was the top rebounder on the floor with 12, plus 22 points to fulfill his role as the team leader.

After the first 19 games, Elliott is leading the Wildcats in scoring, with a 24.4 average per game. He is followed by 6-8 Fleming, who has an 18.9 average per game.

Fleming leads the Wildcats and the WAC in rebounding, with a 12.8 average per game, while Elliott is a distant second with 7.8 boards per game.

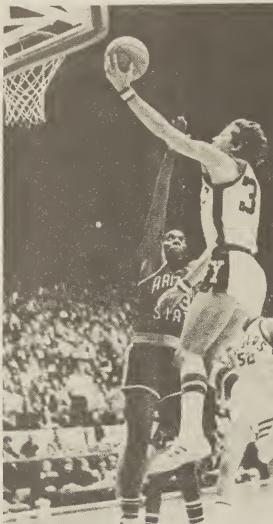

As a team, the Wildcats are averaging 79.4 points every time they hit the hardwoods and are holding the opposition to 70.3 points per game.

Against Arizona, the Cougars, last in rebounding percentage with only 49.7 caroms per game, will try to match speed and muscle with a team that is hauling down a league leading 54.8 rebounds a game.

The last time the Cougars ventured into the Wildcats' den, they were crushed 118-90. That was last year. The Cats hope to change all that this time around.

Along with Elliott, Rappi and Fleming, Arizona will start 6-3 guard Gilbert Miles and 6-8 center Jerome Gladney.

WAC statistics show the Cougars, along with Utah, to be leading the conference in shooting percentage with a 49.1 average. The Cats are also third in team scoring, averaging 81.3 points per game. But their defense is the WAC's worst, they are giving

Universe photo by Paul C. Fletcher

Cougar guard Vervil Law drives toward the basket in an attempt to score two for the Cats against Arizona State.

up a total of 81.9 points a their last three league games.

When the Cougars take on league leading Arizona State (6-1) Saturday, they will go against a team that blew them off the court in their last meeting in Provo.

The Cats were soundly trounced 10-8 at the Sun Devil's disposal, with a 20-point power under the boards, out-rebounding the Cougars 48-40. Guard Rudy White, 6-2, hauled down a game high of nine caroms.

Arizona State also displayed an overpowering second game as the players hit on 61 per cent of their shots, compared to BYU's 44 per cent.

The 30 point deficit in the game at the Marriott Center started with a 10-point shooting percentage loss in the first quarter, the team's leading quarter, averaging just under 17 points a game. Hollins scored 15 points and assisted on 12 more in his last game against the Cougars.

All-American candidate Lionel Hollins, 6-3 guard, is left BYU with an early season 0-4 record in the WAC. But Coach Potter and the Cats appear to have turned things around since then, winning

Portland outscores gymnasts

The BYU gymnastics team found the going tough losing to Portland State in a dual meet Wednesday night.

Portland State, with a team record of 180-6, while the Cougars were only able to tally 173.85 points.

Asst. Coach Gregg Sano pointed out one factor in the loss-star Cougar gymnast Wayne Young was unable to compete. Young is a member of the U.S. team and was traveling to South Africa to represent the United States in the South African Cup tournament.

According to Sano, the standard performance for the Cougars Wednesday was Jay Smith, a senior from Huntington Park, Calif. Smith turned in the best performance of his career in the all-around event, amassing a total of 47.35 points, and placing a close second behind Ron Nissen of Portland. Nissen finished with 48.6 points.

Smith scored 9.05 points out of a possible 10 in the floor exercise, and also scored 8.85 in vaulting and 8.65 on the rings and parallel bars.

Coach Sano said he was very pleased with Smith's performance and progress. Other good performances of the evening were turned in by Rich Trimble, who finished second in the still rings event with a score of 8.75, and by Scott Bleak, who scored 8.7 with his parallel bar routine.

The gymnastics team has three more tune-up meets before hosting the WAC championship tournament March 20-22.

Aides needed to help at pool

Volunteers are being sought to aid in a swimming program for handicapped children, according to Dan Perkins, program chairman.

The program includes approximately 60 children in the area who come twice a week to the Richards Building.

There are currently more children than the present number of teachers is able to train, and volunteers are having to take charge of several students that all may participate, said Perkins.

Interested persons may contact volunteer workers at the pool on Tuesdays and Thursdays from 10 a.m. to 10:45 a.m. No prior swimming experience is necessary.

Ali to donate profits to charity

NEW YORK (AP) — Muhammad Ali said this week that he feels guilty and plans to cleanse himself by giving away all his profits from future fights.

"I feel real guilty making so much money so easy," the heavyweight champion said at a news conference, promptly stealing the thunder from promoter Don King, who was busy beating the publicity drums for the Ali-Chewy

Wepner title fight March 24.

"Fighting George Foreman was an easy \$5 million," said Ali. "Fighting Chuck Wepner will be an easy million and a half."

"From here on out, in all

my championship fights, I

don't want nothing but what

it costs to train. I want my

share to go to needy groups."

Two of the groups that Ali

is known as the Black

said would receive

from his fights — the NAACP and the Nation of Islam, which is also known as the Black

golf team will travel Mexico for tourney

BYU golfer Mike Reid will travel with the BYU to Mexico for the Pan American University Golf Tournament.

By GERRY McKISSICK
University Sports Writer

BYU's golf team will travel down to Monterrey, Mexico, in the 54-hole Pan American University Golf Tournament this weekend.

The tournament could be a preview of the conference's 1975. High schools such as

as last year's champion, Southern Methodist; Louisiana State; Arizona State; Texas; New

Mexico; and Oral Roberts will participate.

For Mide Reid, first team All-American, was the

tournament's 1974 runner-up for medalist honors. BYU finished fifth in a highly competitive field.

According to Coach Karl Tucker, in addition to Reid, he will have a team composed of Jim Blair, Honorable Mention All-American; freshman Mike Brannan; junior John Fought; and newcomer Jim Nelford.

"I feel we have the horses to win it this year," said Tucker, "especially with Reid and Blair playing as well as they are right now."

Of this year's team, all but Nelford and Brannan were members of last year's WAC champions, which placed eighth in the NCAA finals in 1974. Nelford is the player with the least experience to make the trip to Mexico, but the Vancouver sophomore is showing great improvement, said Tucker.

Tucker optimistic

As for the Cougar's chances of winning the title at Monterrey, Tucker is optimistic. "This is an important tournament for us for two reasons," he explained. "First, we will get to see the competition we are likely to meet in the NCAA playoffs. Second, we are going to improve when we find ourselves playing the best competition in the nation." Also, Tucker said Reid has a good chance of winning medalist honors this year.

With such greats as Johnny Miller, Buddy Allin, Mike Reaser and Ray Leach coming out of BYU, Tucker says Mike Brannan is one of the brightest prospects ever to enroll at BYU.

Mike's credentials are many, but the most impressive are his winning of the California State Amateur and the California State Open tournaments. Both these tournaments were won while Mike was still in his senior year in high school.

Another outstanding freshman on this year's team is Dana Booth from Camarillo. He has won tournaments in the Northern California area and possesses the physical tools to be an outstanding player, Tucker said.

According to Tucker, "Every year it seems as though we try to surpass the achievements of the previous season." The highlight of last year was to win a third consecutive WAC crown, said Tucker.

Work cut out

The work is cut out for this year's Cougar team. "This group has the cohesion, unity and desire to succeed as a team as well or possibly better than any group I have had in 14 years," Tucker said.

The tournaments the Cougars have this year will test the stamina of the young team. There is not a senior on it.

Our primary goal is to win the WAC Championship, said Tucker. I intend to devote all of our time and efforts toward achieving that goal.

Tucker feels that the team can improve on its eighth place finish in last year's NCAA tournament; in fact, "we will probably be contenders for the title."

It is Tucker's opinion that this year's team can achieve goals which no other BYU team has every reached, "that is to win a fourth conference championship in a row and finish higher than any other team has done previously in the NCAA."

The next time BYU fans can view the linkers will be April 8, against Weber State. The tournament will be played at the Riverside Country Club.

Mark Berner is shown in stance after returning a ball during the recent Cougar win over San Diego City.

Flu grapples

U. of U. team

Due to illness among the University of Utah wrestling team, this evening's wrestling match with that school has been cancelled.

Denny Howard of BYU's Sports Information Department said that he had hampered the Utah team, with five of the 10 men in the starting lineup too ill to compete.

Howard said BYU's Wrestling Coach Fred Davis agreed to postpone the meet until it could be learned of the illnesses because he felt holding a meet under such conditions would not be fair to the Utah team.

Davis said he would rather write a healthy team than a team with competitors in poor health, who are not normally on the first string, Howard reported.

The match will not be rescheduled, which means that BYU will not wrestle Utah this year, but this will in no way damage either team's season record.

Seating lists

due Monday

Block seating lists for the Utah-BYU basketball game are due Monday by 5 p.m.

Any branch or club may turn in a list to the fourth floor receptionist in the Wilkinson Center. Those not in a branch or club may sign up on a general block seating list at the same place.

Random seating sign-up for the game will be next Wednesday in the ELWC Cloak Room, next to the Varsity Theater, from 8 a.m. to 1 p.m. The random and block seating tickets will be handed out Thursday before the game from 8 a.m. to 5 p.m.

First-come, first-served tickets will be handed out Saturday starting at 4:30 p.m. at the east side of the Marriott Center.

Only one activity card per person will be allowed. Two student and two guest tickets can be obtained on one card.

Cats win first

tennis match

By MAVANEE GLEAVE
University Sports Writer

The Cougar Tennis Team dropped San Diego City College, 7-6, in Wednesday's Dual Meet held at the Indoor Tennis Courts.

Tournament play with San Diego City College went into action Thursday and will continue through today and Saturday. Friday play of the BYU-San Diego City Open Tournament begins at 2:30 p.m. Semi-finals will be Saturday at 10 a.m., and final play starts at 2 p.m.

"In the Dual Meet on Wednesday, Mark Berner played extremely well winning his game 6-2, 6-2 over San Diego's Chris Smith," said BYU Tennis Coach Wayne Pearce.

Cougar Mike Robbins beat Chris Smith, 6-4, 6-7, 7-5. The score was 6-4, 6-7, 7-5.

BYU's Jim Robbins beat Ted Hagey, 7-5, 6-2. Cougar Steve Whitehead lost to Paul Reubens in a close match, said Pearce. The score was 4-6, 7-6, 6-3.

"We had a good win from Alex Hernandez," said Pearce. He beat Jerry Newman, 3-6, 6-4, 6-3. "Alex would normally be playing a higher position, but

he has a pulled muscle. Last year he was in the No. 1 position," said Pearce. "He is playing No. 4 this year."

Competing for the Cougars were Ron Chapman, 7-6, 6-7, 6-3; Porter basked to tennis after playing basketball two years," said Pearce.

In double action, BYU's Mark Berner and Steve Whitehead scored a win over San Diego's Ted Hagey and Dennis Bong, 4-6, 6-7, 6-2.

Cougars Mike Cooney and Jim Robbins, beat Chris Smith and David Bacon, 7-5, 6-4.

San Diego's Tim Kremer and Todd Harvey beat BYU's Alex Hernandez and Dave Porter. The score was 6-4, 3-6, 6-2.

Coach Pearce explained that this year's team is potentially one of the finest tennis teams BYU has had.

Several players have injured and the team will be stronger when these players bounce back into action," said Pearce.

Bruce Kleese, who had been out of competition, is just starting to play again.

"The real tournament strength is sophomore Mike Nissey," said Pearce. He is a transfer student from Santa Monica City College. He was ranked No. 1 last year in California."

Kissinger ends talks with Sadat

JERUSALEM (AP) — Secretary of State Henry A. Kissinger wound up talks with Egyptian President Anwar Sadat on Thursday, had a "friendly and constructive" five-hour session with Syrian President Hafez Assad and then went back to Israel on his Middle East mission.

Before leaving Damascus, Kissinger said he and his team had "a just and lasting peace in the Middle East and Syria's indispensable" role in a final solution of the problem. A Syrian spokesman said bilateral relations between Syria and the United States also figured high on the agenda, but gave no details.

Kissinger's current mission is exploratory and he plans to return to the Middle East around Feb. 15. A senior U.S. official said that at that time Kissinger plans to go first to Cairo to work out details of a sizable Israeli pullback in exchange for moves by Egypt toward acceptance of the Jewish state.

U.S. officials said an agreement would involve a document signed by both Egypt and Israel and hinted that one element of

the settlement would involve replacing the Israeli-owned Abu Rudeis oil fields.

Kissinger confers with the Shah of Iran in Zurich, Switzerland next Tuesday. Iran, which has been Israel's only foreign supplier, apparently would guarantee to make up the losses, with the United States as backup in the event of an emergency.

But Radio Israel quoted informed sources as saying that even if an agreement was reached with Egypt involving Israeli withdrawal in Sinai, Israel would not implement the agreement immediately if the Geneva peace conference also was reconvened, as the Kremlin and some Arab states have demanded.

The radio said Israel would wait until Egypt's position at Geneva became clear before it began pulling back its troops to a new line. It also said the United States was supporting the Israeli position on this point. Although no source for the report was given, it was seen as a leak by Israeli government officials.

Eggs to fly in contest

An egg rocket launching contest sponsored by the College of Chemical Engineering will kick off Engineering Week at BYU Monday at noon in the McKay Quad.

The contest, always one of the more popular on campus, will match contestants who have designed rockets capable of carrying an egg.

Object of the contestants is to launch the rocket at a target 200 feet away and hit it without breaking the egg. All students are invited to attend.

Control of coyote's fate debated in legislature

SALT LAKE CITY (AP) — Friends and enemies of the coyote got a chance to voice their opinions before the Utah legislative committees Wednesday in a battle that spells trouble for the wily predators no matter who wins.

House and Senate committees dealing with natural resources and agriculture held a joint public hearing on opposing predator-control measures.

The hearing was attended by about 250 citizens, mostly conservationists and ranchers, and, despite the strong undercurrent of emotion on the hottest issue before the legislature, the spectators were restrained.

Tension surfaced several times when lawmakers sponsoring the opposing measures clashed over the rules for the hearing and the right of state Agriculture Commissioner Joseph Francis to speak in favor of the bill backed by stockmen.

When it was all over, it was

clear that all sides believed in a need for predator control. What the whooping boles down to is who's going to have the power to do it," said Sen. W. Hughes Brockbank, R-Salt Lake.

The stockmen's bill, would broaden the authority of the state agriculture

Quotation clarifies from Condie talk

Dr. J. Spencer Condie said Thursday that a quotation used in a Daily Universe story concerning his lecture in the Joseph Smith Lecture Series should be clarified.

In a story about Dr. Condie's Wednesday lecture, he was quoted as saying "man has two souls."

The quote was actually a reference to a statement by the German philosopher

Goethe, who said dwell within my one pulls me up other pulls me down.

Dr. Condie said some faculty in him if he were doctrine after the story. The con tract, Dr. Condie's contradicts the ori view of the nature

Council sponsored

New course teaches pro driving

The difference in the Utah Safety Council shows up in terms of accident statistics. For 1973, the council reported passenger cars made up 78.5 per cent of all vehicle registrations and were involved in 82.8 per cent of all accidents. By comparison, trucks made up

17.7 per cent of all vehicle registrations and were involved in 13.2 per cent of all accidents.

The professional driver covers much of his skill to experience, but his experience also is a product of training.

While the average driver may never accumulate the millions of miles of driving experience that the professional driver has, he can learn the same driving techniques professional drivers use by taking the National Safety Council's Defensive Driving Course being taught by the Utah Safety Council;

The concept of reaction time has several implications for the student of defensive driving, according to Ingersoll. First, it exposes the fallacious reasoning of the diligent driver who thinks he can stop as fast as the car ahead of him.

By the time the tailgater sees the brake lights flash on the car ahead of him, his reaction time in getting to his own brake pedal means his stopping distance will be much longer than the stopping distance of the car he is following.

According to Bob Ingersoll, managing director, Utah Safety Council, the Defensive Driving Course is an eight-hour classroom course designed to teach the motorists to avoid accidents in spite of the incorrect actions of other drivers and in a variety of driving conditions. Ingersoll said the course is based on professional truck and bus driver-training programs, and he maintains that no matter how experienced a driver is when he comes into the course, he will have learned something new by the time he graduates.

"For example," Ingersoll said, "most drivers don't realize the good part of reaction distance is that it is reaction distance—the distance the car travels between the time the driver sees a hazard and can get his foot to the brake. Average reaction time is three-quarters of a second. That doesn't sound like much, but at 30 miles-per-hour, a car will travel 33 feet in three-quarters of a second. At 40 miles-per-hour, reaction time adds up to 44 feet, and at 55 miles-per-hour, reaction time adds up to 60 feet of pavement before the driver can even get his foot on the brake."

According to Ingersoll, reaction distance also plays a role at blind intersections.

For example, by the time a driver sees cross traffic coming toward him, even panic

braking may be insufficient to prevent a collision.

Ingersoll said insurance companies have recognized the value of defensive driving in preventing accidents and, as a result, 15 insurance companies now offer 10 per cent discounts on their premiums to drivers who have completed the Defensive Driving Course. He also said one car rental company gives

course graduates 10 per cent discounts on rental fees.

Utah Drivers who are interested in taking the Defensive Driving Course can contact the Utah Safety Council for registration information. The class schedule is as follows. According to Ingersoll, classes have been scheduled at times that will be convenient for most Utah Citizens.

Car Club to direct auto trial

The BYU Sports Car Club will host autocross racing Saturday, beginning at noon at the Cougar Stadium parking lot.

Boyd Butler, vice president of the organization, said any student, faculty member or staff member driving a 16 participant, whether or not he is a member, should meet at the parking lot at 10 a.m. for inspection before the racing begins.

The Sports Car Club has been an active supporter of the autocross racing popularity which has been sweeping the U.S. in the last 10 years, Butler said. "The trend is getting away from the dragsters to better balance between handling and acceleration." The cars are divided into seven classes, depending on the type of car entered, he said. Any car in good condition is eligible.

Autocross is a precision form of racing along a oval track. The drivers start slalom course with top speeds of about 50 miles per hour. Each contestant participates in a trial run and three timed runs. The best timed run determines winners in each class, with trophies awarded after each competition.

Saturday's participants will be able to receive driving pointers and help from experienced drivers, Butler said.

The club, consisting of 30 members, is also making further preparations for other races throughout March and April.

The Daily Universe
OPINION—COMMENT

Brigham Young University

'Special' weeks
emphasize groups

Political Week, Women's Week, Family Life Week, Agriculture Week, International Week, Consumer Week, Indian Week, Mental Health Week, Military Week, Self-Image Week—we even have a "Daily Universe" week.

From the observant to the nonchalant, just about everyone has noticed the many weeks throughout the school year set aside to honor a certain campus group or department. The fact that "almost every week is someone's week" can cause such observances to lose their novelty and probably produce groans from students who wonder if there are any "plain old" weeks left.

What these lacrimal students may forget is the activities centered around these observances, such as the upcoming Engineering Week, do serve a purpose and provide beneficial opportunities to students and local community members.

"Our object is to draw attention to the importance of engineering in society," says Armin J. Hill, dean, BYU College of Engineering.

"The main thing we get is a focus of activity," he continues. "It is very definitely an incentive for students to tackle unusual projects."

Hill said high school students from surrounding areas are brought in by bus to tour the department and gain exposure to the entire engineering spectrum.

Alan Britts, associate director of Asian Studies who is in charge of next month's History Week, agrees that the declaration of an official week draws attention to that department.

"It also gives us a chance to bring in world-renowned specialists in that area," he added.

Britts pointed to the variety of events on the docket for the beginning of Asian Week, among which are the visit of the Korean ambassador to the United States, an exhibit of Asian art and celebration of the Chinese New Year.

All these, he said, are an effort to expose a greater percentage of the student body to the many achievements of the BYU Asian Studies program.

In addition to focusing on certain campus departments, special "weeks" enable concentration on a point that leaps departmental boundaries, such as Mental Health Week.

Special weeks are a valuable vehicle for drawing attention to superlative achievements that would otherwise pass unnoticed beyond the corrugated battlements that surround every discipline.

We are a campus of specialists and would-be specialists, a circumstance that is antithetical to the ideal spirit of a university. The offerings of the various special weeks on campus provide students and faculty the opportunity for cultural and intellectual growth, diseases hazardous only to ignorance.

**Build human element
to develop Y potential**

BYU is a school teeming with potential, but cursed with a scarcity of imagination. Lofty slogans are thrown around constantly, emphasizing this as "the Lord's university" and speaking of its "prophetic destiny."

This tends to do two things. First, one hesitates to criticize the Lord's university—how can such a direct attack on the Lord be? Second, a school with a "prophetic destiny" of greatness hardly needs help anyway. If things just glide along, BYU will become the world's penultimate academic stronghold.

BYU may be the scholarly estate of the Lord's true church, but it is not a church, and it is not directly administered by General Authorities. One would hope that a divine substitute for its vast and defeating bureaucracy can always be devised, but for the times being, some drive and inspiration on a very human level would help.

BYU's rise to its destiny doesn't have to be "prophetic," one as a Daily Universe editor suggested. Only in the context of developing in the present mental scheme of things would the rise need to be a slow, if not impossible, one.

For BYU to be successful, investing its energies in like, safe facilities, rather than in human intangibles that might temporarily shake things up on an academic level. The great potential of BYU is derived primarily from its in-depth physical resources—the cultural, athletic, recreational, and specialized facilities on this campus are peerless among the nation's colleges. Yet BYU is dismissed as insignificant when juxtaposed with universities like Stanford, Chicago, Michigan or the Ivy League schools.

BYU lacks imagination. Spending fitting carries with it a tremendous responsibility, so it is used on visible, obvious projects, like the biggest activities center or the basketball and tennis center. Yet other schools get much more mileage out of humble quarters. BYU has thus far directed itself towards the Mormon community only. The radical change that must occur to develop Y potential becomes great requires that it direct itself to the nation and to the world—LDS and non-LDS. This means that, in addition to serving the Mormon community, BYU will be serving everyone, and

and contests, BYU could easily become a major film school.

The new Department of Film and Cinematic Arts could pull off a major coup by being done currently at seven universities, none of which has its own studio; this could be distributed nationally and further attract attention to the film program here. The recent successes of BYU films, such as the French Capra retrospective, prove the popularity of classic films, regardless of their age; the television station and locations like the De Jong Concert Hall could show films, with intelligent back-up, on a provided-through personal contact when possible—on the arts involved.

The immense network of facilities and media at BYU could be integrated into a film school of prestige and influence that thousands of students—Mormon and non-Mormon—would apply to BYU in order to become involved.

This pipe dream may seem farfetched, and it is, but because the human element is lacking. The "film-school" situation is just an example; this is a university dilemma. The equipment and facilities are already here, but the personnel and daring necessary to make it work is not. BYU is recognized outside of Utah as the definitive academic example of quantity before quality. We have the biggest, the most, but not the best.

There is no room to move slowly in an effort to improve upon the situation. People, not buildings or slogans, make a great university, and it would be nice in our lifetime to hear of the nation's great institutions of higher learning.

—Robert Garrick

Carillon: Beauty — at no cost to student

The fifth grade teacher sent a little boy from the room for misbehaving. The teacher, instead of punishing him, took him back to his room and had the other children vote on whether the teacher had used good judgment in her treatment of him.

Similarly, some students would have us vote on whether or not the president should be given good judgment in authorizing the construction of the Centennial Bell Tower on campus.

There has been such a barrage of criticism against the proposed construction of the bell tower commemorating BYU's centennial that a few points of clarification need to be made.

First, the project is authorized, not by the Centennial Committee,

but by the Board of Trustees of BYU. Is it within the power of the trustees to decide whether that is good judgment or not?

Second, there is always an element of uncertainty when anything big is undertaken.

When the Salt Lake Tabernacle was begun, Salt Lake City was without indoor plumbing and paved streets. It had no meeting houses or log cabins. Surely the unfinished tabernacle seemed to be only a monstrous building in the middle of the prairie.

When the Marriott Hotel was started, the cries rang out, "It's a monstrosity! We'll never fill it!"

Doubtless when France sent the Statue of Liberty to America, someone stood on the shores of the

Atlantic waving his fists and shouting, "What can we do with the past that they could buy?" And yet, how many people has that great lady of liberty inspired?

Immediately the response is, "Yes, but we didn't pay for the Statue of Liberty."

And we're not paying for the bell tower either. At least not directly.

The tabernacle is a public resource. Allocations from a contingency reserve fund made up of leftover monies from the ASBYU treasury collected throughout the years; the "Faculty-Staff Together For Greatness" fund will consist of donations from those who buy, and the greatest share, donations from alumni and friends of the

university, many of whom have

specifically donated for the

carillon. Third, according to Bruce Olson, director of University Relations, the carillon will not exceed the decibel level prescribed in the noise ordinance.

Fourth, qualified university students will be given the opportunity to play the carillon, one of the few in the entire country.

Fifth, it will have cast-tuned bells that will not deteriorate with age.

A BYU student from Ohio said, "I'm all for it. My town has a carillon and it is beautiful when the bells echo off the mountains."

And that is the sixth point. Day after day of studying, going to the library, doing term papers and buying textbooks instead of dinner

can be rewarding, but in the long run, something is needed to feed the soul in biology.

"The bells will play for campus the great music that has accompanied the spirit of this campus, Lorin Anderson said.

It will be a beautiful education on the can major educational ins

the church.

"Beauty is not a necessary, it is a beautiful, and we have a beautiful soul, and a soul that is ennobled by the greatest need of all."

Students expound views in Letters to the Editor

Soft straps

Editor:
As one of the nurses at Utah Valley Hospital, I felt Michael Rossetti's comments on electronic fetal monitoring deserved.

First, I can't imagine what type of external monitor was applied to Mrs. Rossetti during her labor, but it certainly was not one of the new Hewlett-Packard electrodes. They do not resemble a "finger-size stem" in the least.

Second, no matter what the device looked like, it would be impossible to leave a mark on the baby which lasted three days, let alone three years. I would suggest he look elsewhere for causes.

Third, the information which Mr. Rossetti seemed to like is theory—electrode leaving a mark on the baby. The mark is generally about the same as is left by a hypodermic needle.

However, it cannot be applied until the membranes have ruptured. Thus, the early necessity for an external electrode.

Now that he has scared all the pregnant mothers to death, let me say a word in behalf of fetal monitoring.

The University of Utah has not had a single fetal death, while the mother was in labor since they started using monitors.

That record in a high-risk facility is phenomenal.

In one month alone, at Utah Valley Hospital, we

were able to save eight babies which otherwise might not have made it, because of the miracle or our "electronic wizardry." It is important to know right away that the babies were in trouble.

Our infant mortality rate last year at Utah Valley was nine per 1,000 births, as compared to 21 per 1,000 nationally, partly because we have the best monitors.

That, in spite of the fact that we deliver more babies than any other hospital in the nation of comparable size.

The babies are safer while the mothers are in labor, when problems arise, they can be taken care of before the baby gets in serious trouble, and the baby arrives in better condition with a higher Apgar Score. So, ladies, before you knock that monitor try it! You will probably find those "soft straps" not so bad, and the peace of mind you get from hearing that little heart chug continuously along is well worth any minor discomforts incurred.

Mr. Editor, where are the values of the paper to allow a scene like this to be printed? As a prenatal class teacher for the past ten years, I can tell you how difficult it is to undo one thing like that.

It is now considered a blessing to have monitors available, and it is particularly imperative that they be used in cases of high risk to the baby.

Mrs. Deanne Francis, R.N., Utah Valley Hospital

Gaudy

Editor:
The groundbreaking ceremony for the school's carillon is another sample of centennial clowning that has cloyed the university beyond the point of endurance.

The babies are safer while the mothers are in labor, when problems arise, they can be taken care of before the baby gets in serious trouble, and the baby arrives in better condition with a higher Apgar Score. So, ladies, before you knock that monitor try it! You will probably find those "soft straps" not so bad, and the peace of mind you get from hearing that little heart chug continuously along is well worth any minor discomforts incurred.

Mr. Editor, where are the values of the paper to allow a scene like this to be printed? As a prenatal class teacher for the past ten years, I can tell you how difficult it is to undo one thing like that.

slander the hardy spirits of Brigham Young, Abraham O. Smoot and other founders of the school.

There are many more events like the groundbreaking for the carillon, our academic community will soon become satiated with supercilious centennial stunts.

We may miss an important opportunity to evaluate our past and our place in the future. I, for one, would like to see us quell the centennial fever sufficiently to prevent it from deforming in its infancy.

Penny Cherrington, Midland, Tex.

Rancor

Editor:
I have recently read (with reactions of remorse, revenge, and reverence) the rash writings recapitulating repulsive

Y's & Wheres

Luperus, "destroyer of wolves," was the central figure of an ancient Roman festival, the Lupercalia, held on Feb. 14 or 15. It was the custom then to put the names of all young maidens in a box and allow each bachelor to draw. The damsel he drew became his Valentine for the year. It was his duty to give her attention and protection.

Later, in England, it was customary for the man to wear the name he had drawn on his bosom or on his sleeve. Even among the upper classes this was popular as late as the fifteenth or sixteenth century.

England had an "infallible" method of foretelling their future husbands. On the eve of St. Valentine's the damsel would pin five bay leaves to her pillow, one at each corner and one in the middle. If she dreamed of her sweetheart, he would become her husband within the year. To make sure, she could hard-boil an egg, take out the yolk, and fill the hole with salt. Before going to bed, she was to eat the egg, shell and all, and not speak or drink before sleeping.

Today, it is still customary for young maidens and bachelors to pair off, though they devise their somewhat less formal methods. Some prefer choice over chance but have no guarantee of a year's loyalty.

Many parts of ancient custom are still with us, others have been lost. Perhaps it would be good to review this old Roman custom as it relates to our Valentine's Day celebration, and finally give old Luperus, "destroyer of wolves," his cupid's due.

—Loren Westenskow

Energy plan contains conflicting proposals

By JOHN CUNNING

Ap Business Analyst

NEW YORK (AP) — President Ford's order releasing as much as \$2 billion in highway funds has drawn criticism that it is an expedient rather than a plan, and a contradictory one at that.

But this is an economy of contradictions.

While urging the nation to cut back on its consumption of energy, Ford is in effect seeming to it that the use of energy is encouraged by building the roads over which the energy-busy economy operates.

Most people can half-dozon socially desirable projects, beginning with mass transit projects that actually would save energy, that could benefit from a similar infusion of funds.

But while oil and other commodities might be in short supply, criticism isn't. Leadership throughout the world is faced today with such a complex of circumstances that nothing seems to satisfy, or even seem logical.

Perhaps the most baffling conflict is the concurrent rise in nationalism and the growing interdependence of nations.

The Arabs, for example, can sell all the oil they can from the sands but it won't

do them much good if Western nations don't buy it, because Arabs couldn't buy Western technology.

Another head-on conflict exists in the rise in consumer expectations throughout the world and the reality to turn those expectations into conflicts with the environment.

There is no end to the list. Even against inflation poses the threat of recession, and vice versa. The struggle for oil is a struggle in itself.

The entire economic climate is state of change that philosophically clash with what is practiced.

Big business fights for its survival from Washington and then, when seeks special treatment there. Governmental agencies set up to regulate business are accused of being conservative and unjust and wasteful.

The climate being what the President's highway building plan seem out of place. The entire picture is kept in mind, and not the pieces that make up the picture.

But in an economic world in which the bigger picture is more and more

rewards, it is the beginning. Something needed to feed the soul in biology.
